

Our Little Miracle

Welcome! Your baby book is ready

Everything you need to know, in 60 seconds.

1

Save the file somewhere safe

You received **OurLittleMiracle.html** — that file IS your baby book. Save it to your phone's Files app, your computer, or cloud storage. You can copy it anywhere; it always works.

2

Open it in your browser

Tap the file and choose **Safari** or **Chrome**. No app, no account, no internet needed. Tip: use your browser's "Add to Home Screen" so it opens like an app.

3

Start writing — it saves itself

Enter your baby's name on the cover and go. Every word and photo saves automatically **on your device** — 100% private, nothing is uploaded anywhere.

4

Add photos from your camera roll

Tap any photo box to add a picture — birth photo, every milestone, and one for each month of the first year.

5

Back it up (once a month is perfect)

On the **Home** page, tap the big **Back Up My Book** button (it also shows how full your storage is). It downloads one small file with everything — words and photos. Keep it in your cloud storage or email it to yourself. To move to a new phone: open the book there, tap the **settings button** → **Restore from Backup**.

6

Print it whenever you like

Tap the **settings button** → **Print / Save as PDF** for a beautiful printable keepsake of every page.

GOOD TO KNOW

- Your book lives in the browser you first opened it in — keep using the same one (e.g. always Safari).
- Clearing your browser's website data can erase the book — that's what backups are for.
- The Home page shows a storage bar. When it nears full, back up and thin out a few photos.
- Switch color themes and fonts anytime in settings — your words stay put.
